# Device Workflow Solutions
Fax Forward / Fax to Server

brother
at your side

Brother all-in-one printers offer advanced fax capabilities designed to help streamline workflows while ensuring efficient and secure document exchange—ideal for fax-intensive environments.

Fax Forward to Cloud or Email

Automatically forward incoming faxes to a specified cloud service or email address[1].

- **Convenient built-in feature within Brother Apps.**
- **Forward to Google Drive™, Dropbox, OneDrive, Box, OneNote, Evernote®, and SharePoint Online.**
- **Forward to a designated email address using the Easy Scan to Email feature.**

✔ Access received faxed documents from virtually anywhere.

✔ Receive email alerts to stay informed whenever a fax is securely forwarded to a chosen cloud service.

USE IF: Environment requires an improved workflow for receiving faxes and forwarding to the cloud or an email address.

Fax Forward

Automatically forward incoming faxes to another fax machine or email address[2].

- **Enables users to share received documents with others via fax.**

✔ View received faxed documents from virtually anywhere via email.

USE IF: Environment requires a more efficient workflow to receive faxes and forward them to another fax destination or email address.

Fax to Server

Scan documents and send them over the network to a fax server.

- **Documents are converted to fax data and sent using standard phone lines.**
- **Brother all-in-one printers can integrate into a fax server environment.**

✔ Eliminate the need for individual phone lines connected to each machine.

USE IF: Environment has a single fax server installed.

Consider I-Fax

Alternative solution that enables sending and receiving faxes over the Internet instead of using a regular phone line.

- Can be implemented to address security or volume concerns.
- Track incoming and outgoing faxes.
- Offers a solution when a regular phone line is not easily accessible or cost prohibitive.

1 Requires an Internet connection. Fax Forward to Cloud requires an account with the desired cloud service.
2 Requires POP3/SMTP or IMAP mail server support for forward to email.
